

PROJECT OUTPUTS

- 1) Training Curriculum
- 2) The ICT Based E-Learning Module
- 3) Practical Handbook on Use of Computers and Internet for Elderly People
- 4) The Content of Training Materials
- 5) Quick Solution Centre Application

TRAININGS

- 1) **Short-term joint staff training event in Belgium:**
In order to improve professional skills of trainers, training course will be organized in Belgium with participation of 5 trainees from Turkey, 2 trainees from Spain and 2 trainees from Italy for 7 days.
- 2) **Short-term joint staff training event in Italy:** In order to improve professional skills of trainers, training course will be organized in Italy with participation of 5 trainees from Turkey, 2 trainees from Spain and 2 trainees from Belgium for 7 days.

SEMINARS

Seminars will be organized in Burdur (Turkey) and Catania (Italy) for sharing and disseminating the intellectual outputs realised by the project to the relevant stakeholders.

WHAT ARE THE ISSUES?

- * There is a rapid demographic change both in Turkey and in Europe.
- * In the near future nearly a third of the population will be elderly.
- * Ageing is usually associated with loneliness and isolation,
- * Elderly often feel confused when faced with new Technologies
- * They have some problems on reaching news, health information, shopping (e-trade), and the ability to stay in touch with distant friends and family

However ageing can also be an enjoyable experience if senior citizens are provided lifelong learning opportunities

BREAKING DIGITAL BARRIERS: BUILDING DIGITAL LITERACY FOR ELDERLY AGEING TOGETHER

Ageing Together Project is carried out under the European Union Erasmus+ Strategic Partnerships Programme in the field of Adult Education call for proposal 2018. Duration of the Project is 2 years.

Project is addressed to seniors over 60 years and attempts to improve the integration of this society group by providing them with digital literacy, which was actually recognised as a basic human need.

Generally, elderly people have problems to reach news, health information, online shopping and to perform other internet-related activities, for this reason the project will impart them digital skills and new learning strategies that are likely to be used on a daily basis. Thus, the project will ensure the participation of individuals over the age of 60 in social life and will support active ageing and social inclusion of the elderly.
